

## TIP SHEET FOR PARENTS & CARERS

YEARS 5-6  
TERM 4 2024

### What did your child learn about at school?

**Red Flags** are clues that warn us an interaction may be **unsafe**. An unsafe interaction could have one, some or all of these red flags.

Online there are people sharing their **opinions and beliefs**. Each of us needs to **mindful and be aware** of stereotypes and harmful ideas.

**Artificial Intelligence (AI)** is all around us in many different forms. Generative AI has amazing possibilities but we have to use it with our **critical thinking** brains engaged

### Some conversation starters:

- What sort of places online (websites, games, apps) could you come across unsafe people?
- Have you or a friend ever encountered another player that you thought was "suss"?
- Is there anyone or anything online that you think is really "wrong" or "harmful"?
- Let's explore an AI chat assistant (e.g. Gemini or CHatGPT) together to help us...plan, learn, write jokes, explore, discover.

### Further Support:
